

SOMA WIRAGA
UIUX LAB SRIN

SHARING SESSION

TABLE OF CONTENTS

- Team form & Collaboration model
- Job Description
- Design Process
- Design Approach

UIUX DESIGN TEAM SIZE

4

Mini Team

2 - 4 people
(SRIN ‘20)

10

Small Team

5 - 10 people
(SRIN ‘24)

50

Large Team

20 - 50 people
(BRI, Tiket.com,
Blibli)

UIUX DESIGN TEAM STATUS

Fully
in-House

SRIN

Main
in-House

BCA, BRI

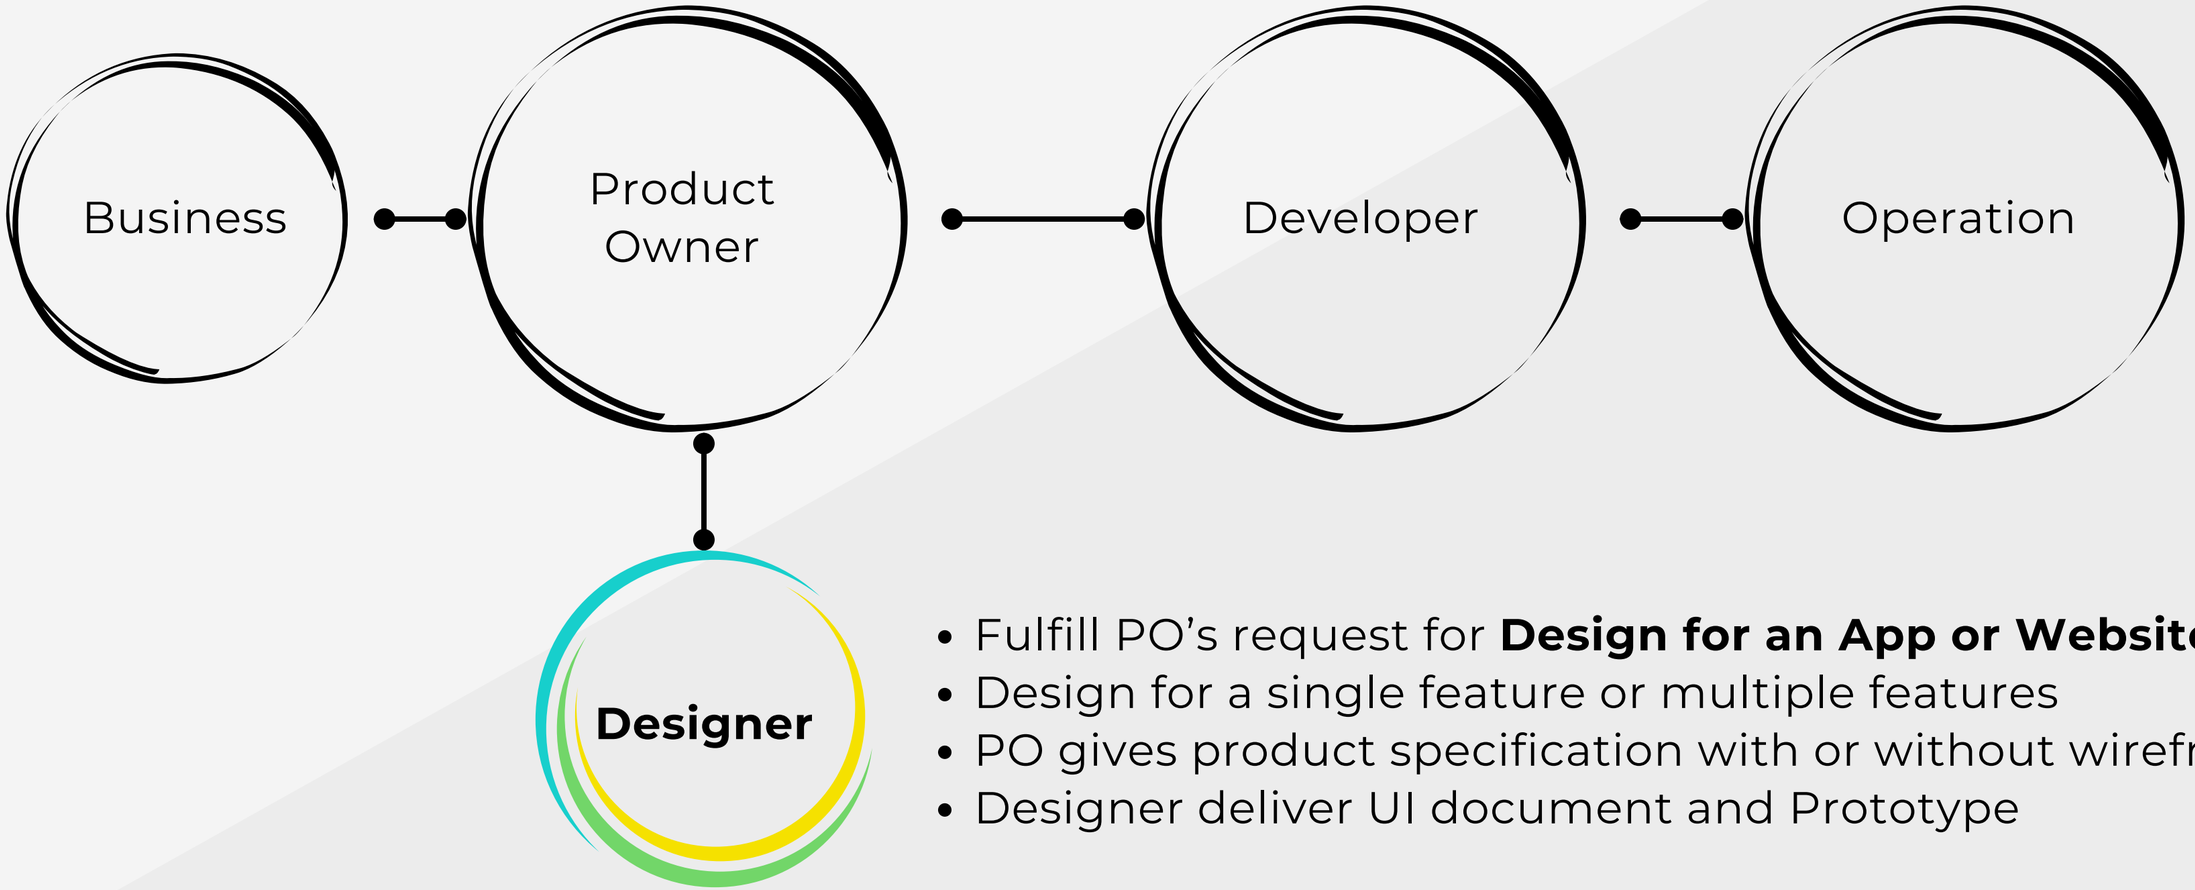

Design
Agency 1

Design
Agency 2

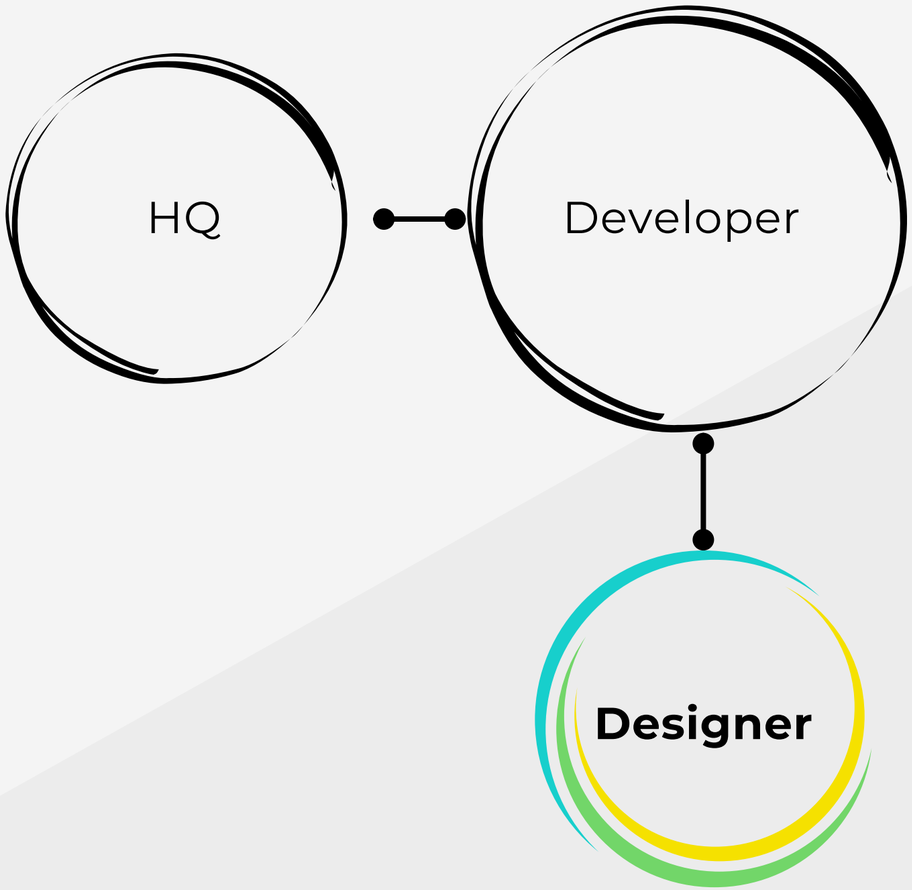

Fully
on Vendor

COLLABORATION MODEL A

- Fulfill PO’s request for **Design for an App or Website.**
- Design for a single feature or multiple features
- PO gives product specification with or without wireframe
- Designer deliver UI document and Prototype

COLLABORATION MODEL B

- Fulfill Developer’s request to **beautify their system or design a new feature**
- Developer shares their system and how it works
- Designer deliver UI document and Prototype

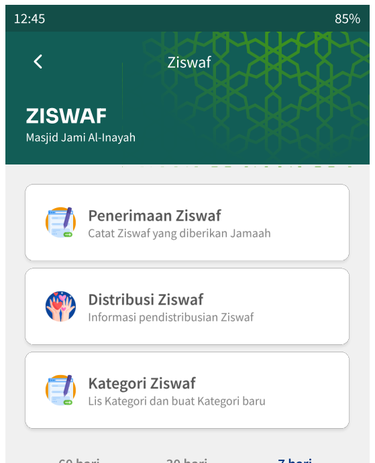

UIUX DESIGNER

- All around Designers that create user flow as well as Graphical User Interface.
- Expected to create Design, make Prototype, conduct user testing and UI review of development result
- 1 member can do 2-3 projects depending on Project load

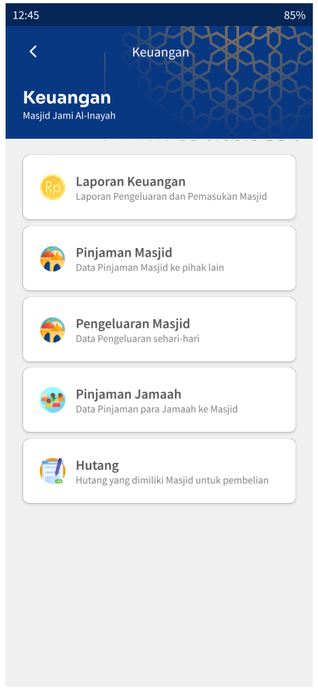

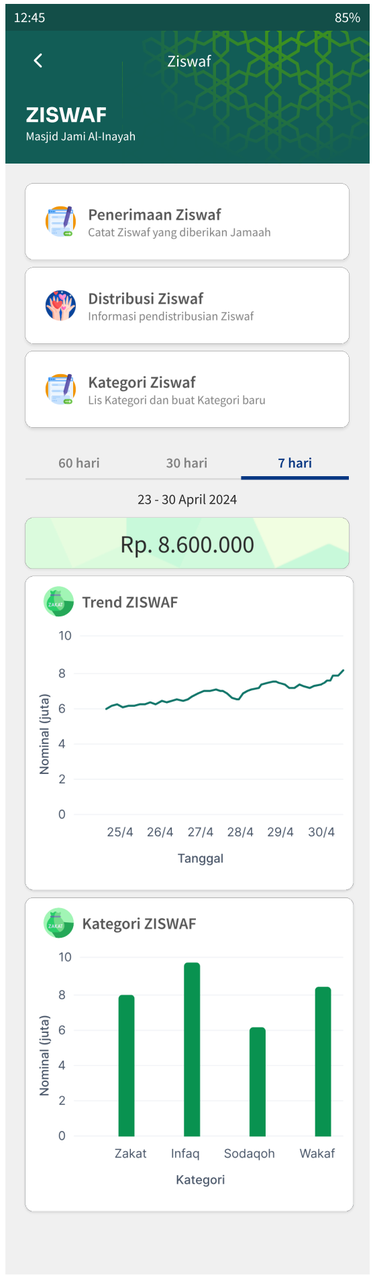

UI DESIGNER

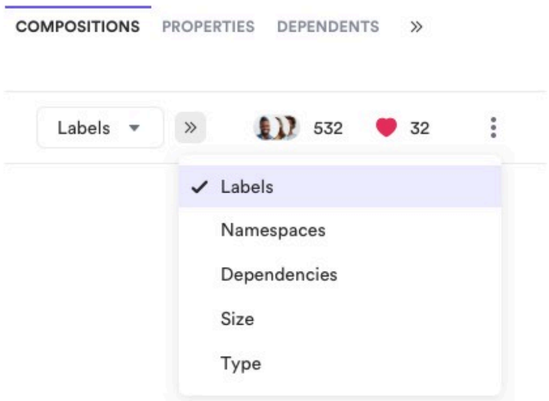

- Creates a user flow document that defines how a feature of an App or Website works
- The user flow defines multiple use cases as well as edge cases
- Deliverables are in the form of Wireframe and/or diagrams

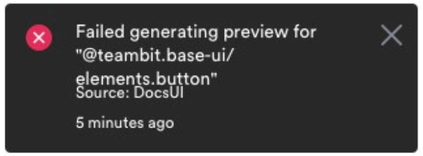

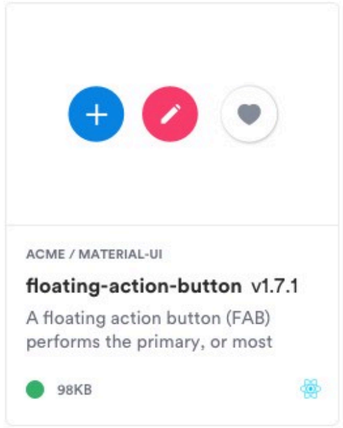

GUI DESIGNER

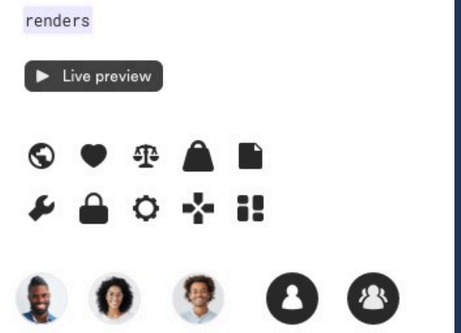

- Creates a Graphical User Interface for an App or Website, based on the UI Design (User flow)
- Defines colour, sizes, fonts and images of the Design
- Deliverable are in the form hi-fidelity Design.

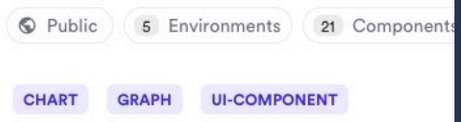

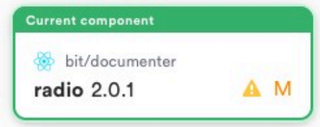

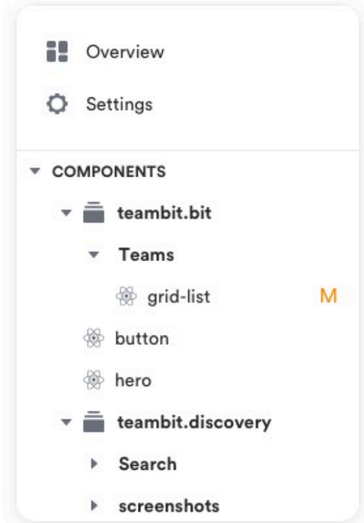

DESIGN SYSTEM DESIGNER

- Focus on building standard components that can be reused by multiple UIUX Designer
- Support and facilitate Designers in building a standard Design that they can agree together
- Deliver Design as a standard Component Sketch (Symbols) / Figma (Master Component)

DESIGN MANAGER

- People manager role, managing resources to work on Design tasks
- Manage Designer’s work load and schedule.
- Checking Design quality and responsible for team deliverables
- Do small amount of Design work

DESIGN PROCESS

NORMAL PROCESS

System Understanding

Learn current system

Ideas

Wireframe & Concept

Prototyping & UI Document

Prototype create UI Design and its Design Spec.

Design Brief

Brief or Request from Product Owner / Dev / Stakeholder

Secondary Research

Desk research to see existing product / services

UI Design

Design work on Figma / Sketch

Dev Handover

Explanation of Design Specification to Developers

DESIGN PROCESS
+USABILITY TEST

Design Brief

Explanation of Design Specification to Developers

DESIGN APPROACH

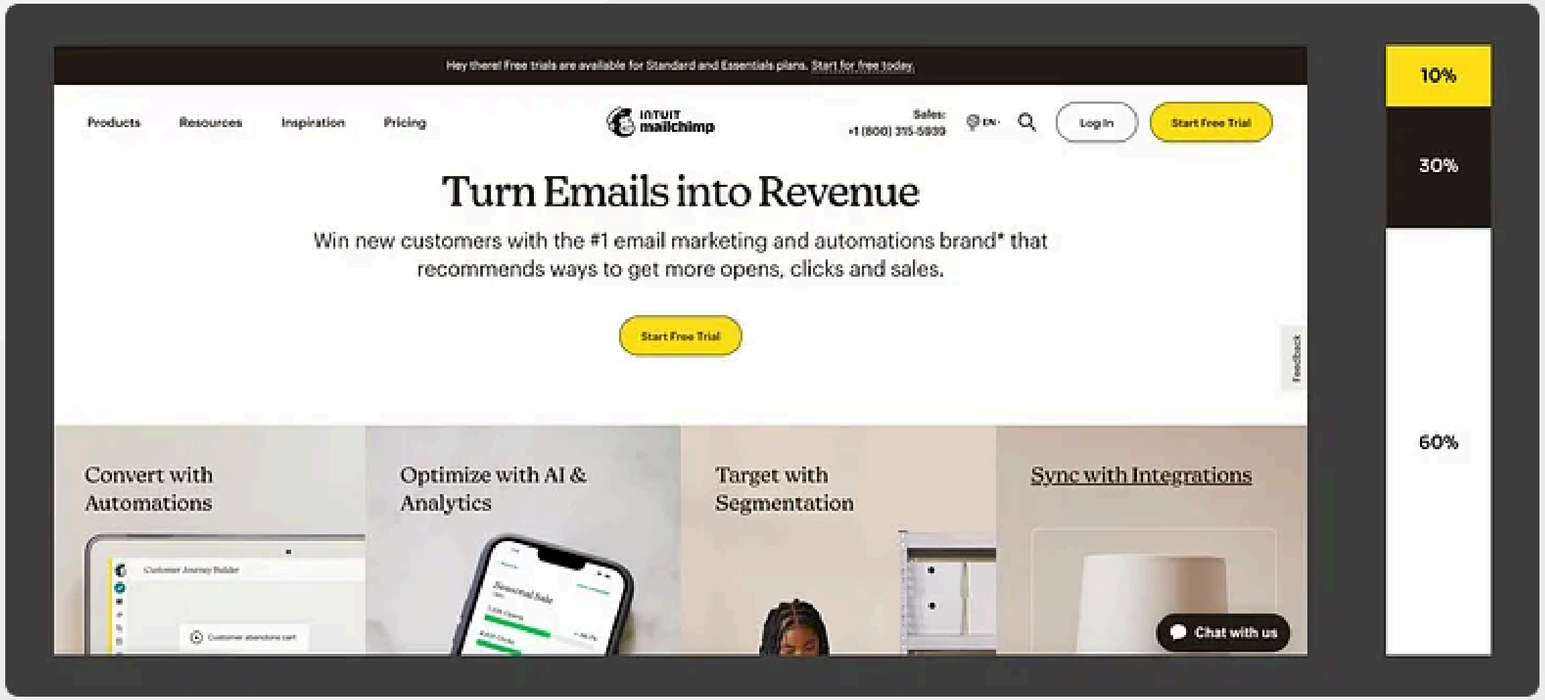

USE OF COLOUR

Composition of “Brand” Colour

Play of Contrast Colour - 60-30-10 rule

DESIGN APPROACH

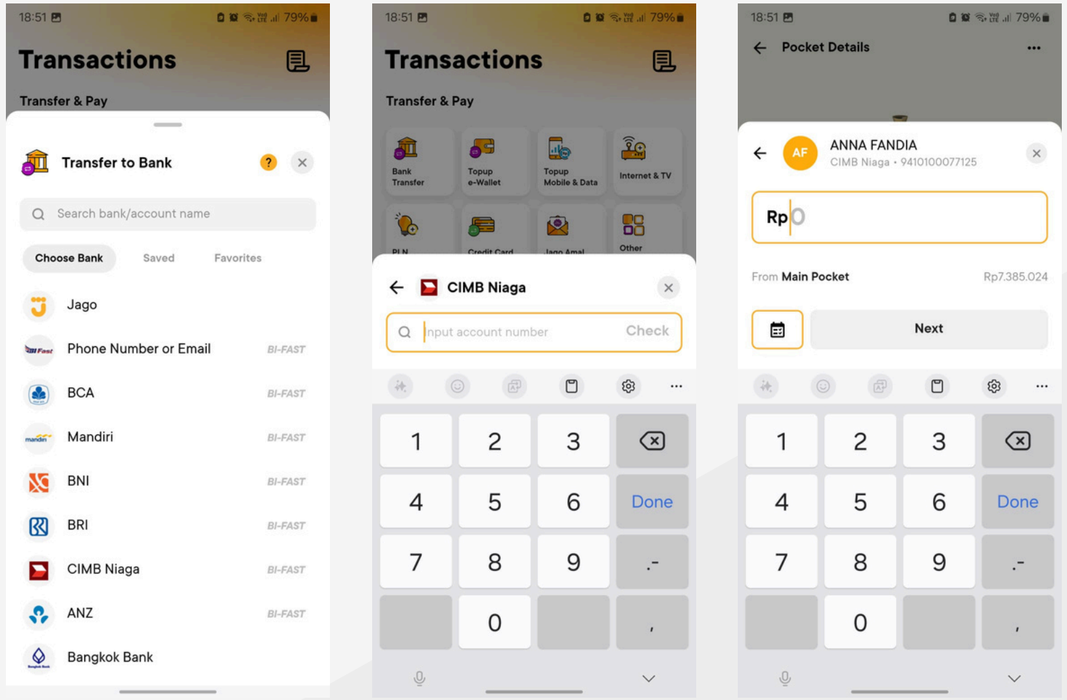

INTERACTION ON MOBILE & WEB

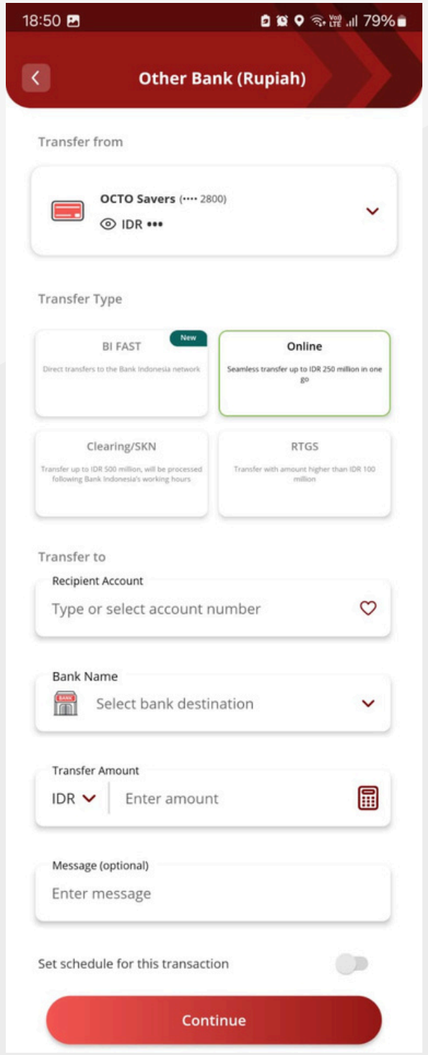

- Large screen area enables user to see and interact more in 1 page
- Small screen drive the pages to be divided into multiple pages
- Large screen can contain lots of contents where the eye can travel fast to consume.
- “Less steps = better design” dogma is best for Desktop

DESIGN APPROACH

INTERACTION ON MOBILE

Multi screens for Bank Transfer

1 long form for Bank Transfer

Multiple screens are more convenient on Mobile than a looong screen

DESIGN APPROACH

MAKING DESIGN DECISION

1

Ask Opinions

Setup
Design Critic
Session

2

Secondary
Research

- Search Best Practices
- Compare Articles
- Compare Books
- Compare Journals

3

Primary
Research

Conduct
Usability Test

THANK YOU
